CVE-2021-30114 #2

Open **0xrayan** opened this issue on Apr 7, 2021 · 0 comments

0xrayan commented on Apr 7, 2021 Owner

Product : Web-School ERP V 5.0

Description: Web-School ERP V 5.0 contains a cross-site request forgery (CSRF) vulnerability that allows a remote attacker to create a voucher payment request through module/accounting/voucher/create. The application fails to validate the CSRF token for a POST request using admin privilege.

Recommendations :

1- Implement `X-CSRF-TOKEN` and make sure it's validating in back-end server as well
2- Implement an interceptor which appends token value to every (state-changing) request in custom request header `X-XSRF-TOKEN-B`
Video POC : Google Drive

POC :

```
<!DOCTYPE html>
