CSV Injection with the export feature

Description:

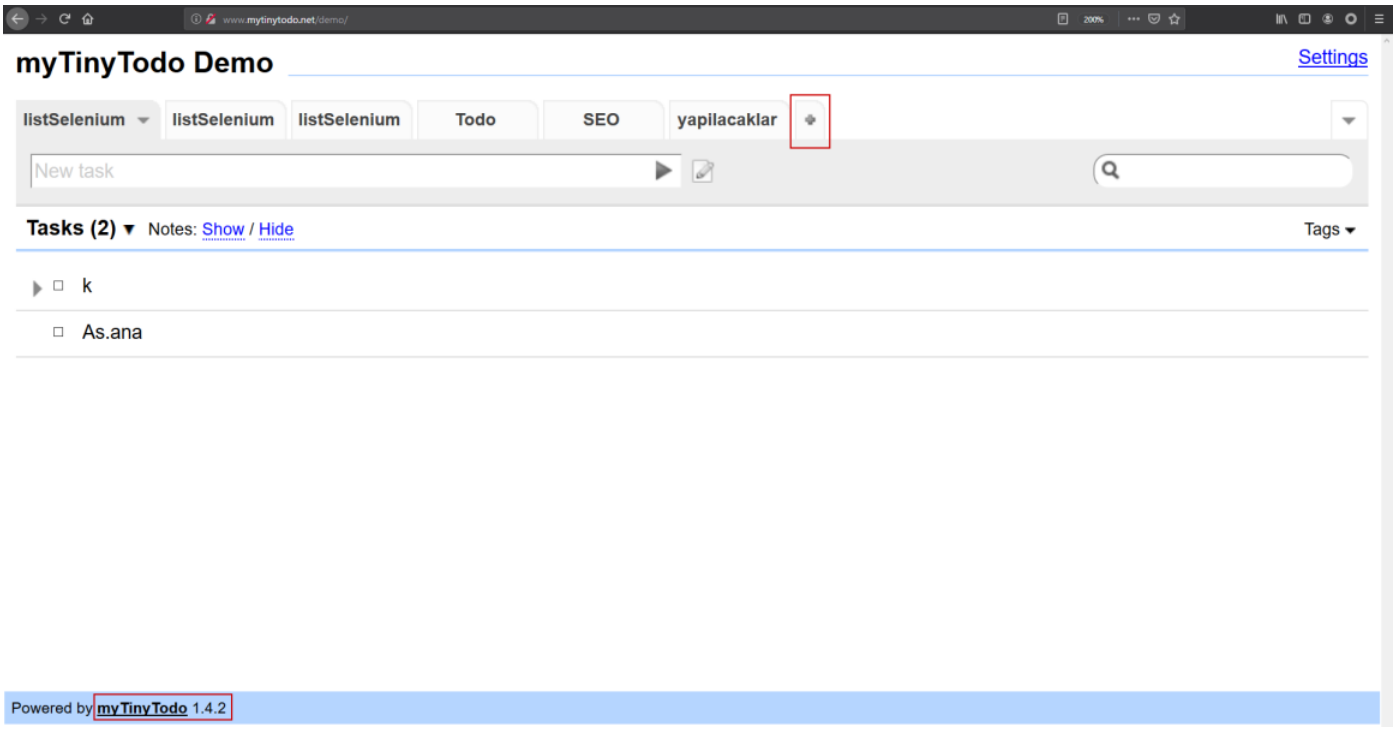
```
A vulnerability in the file upload feature allows attackers to send
malicious csv files. By using the Microsoft Excel DDE function an
attacker can launch arbritary commands on the victims system.
```

Version

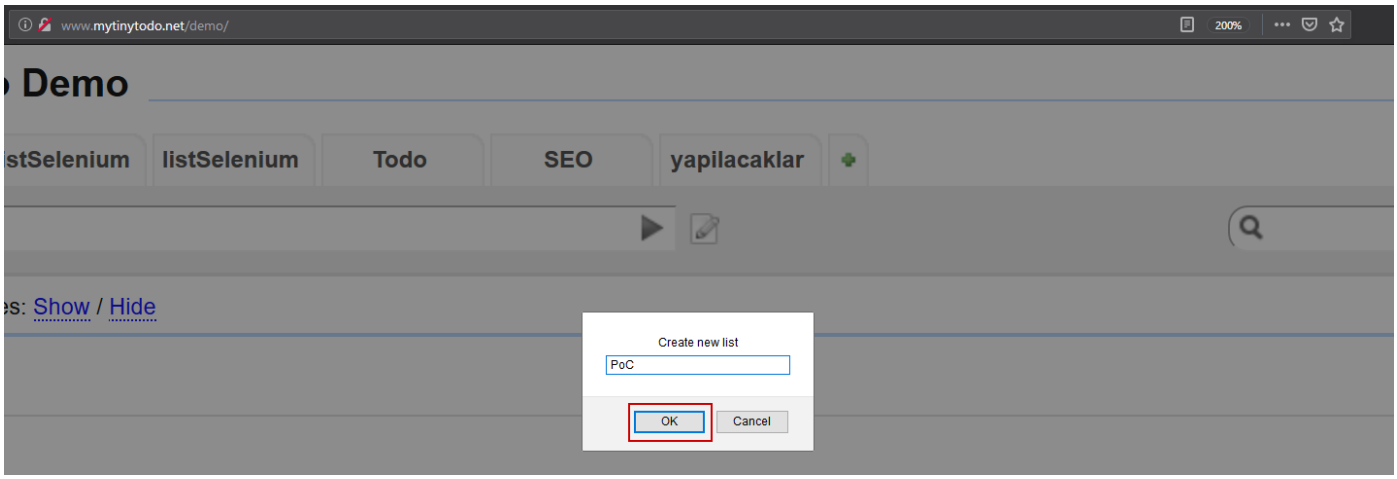
```
1.3.3 <= 1.4.3
```

PoC:

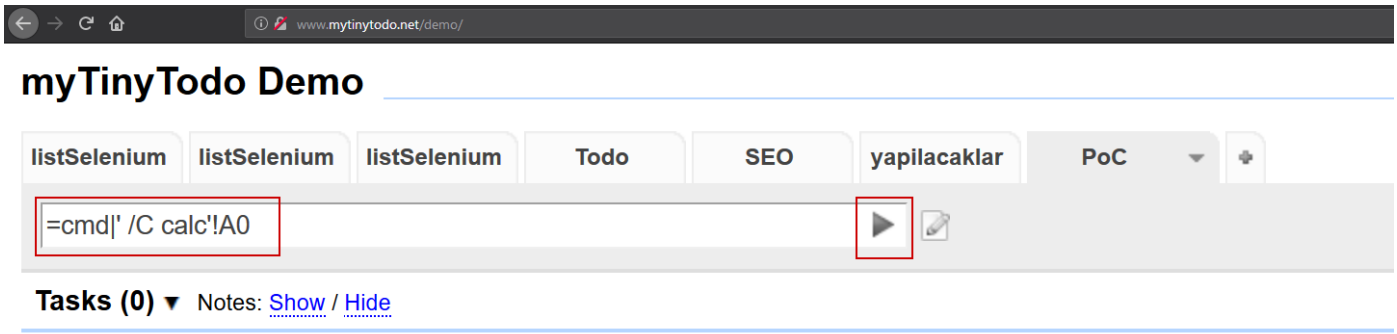
1. Go to victim website (ex. http://www.mytinytodo.net/demo/)



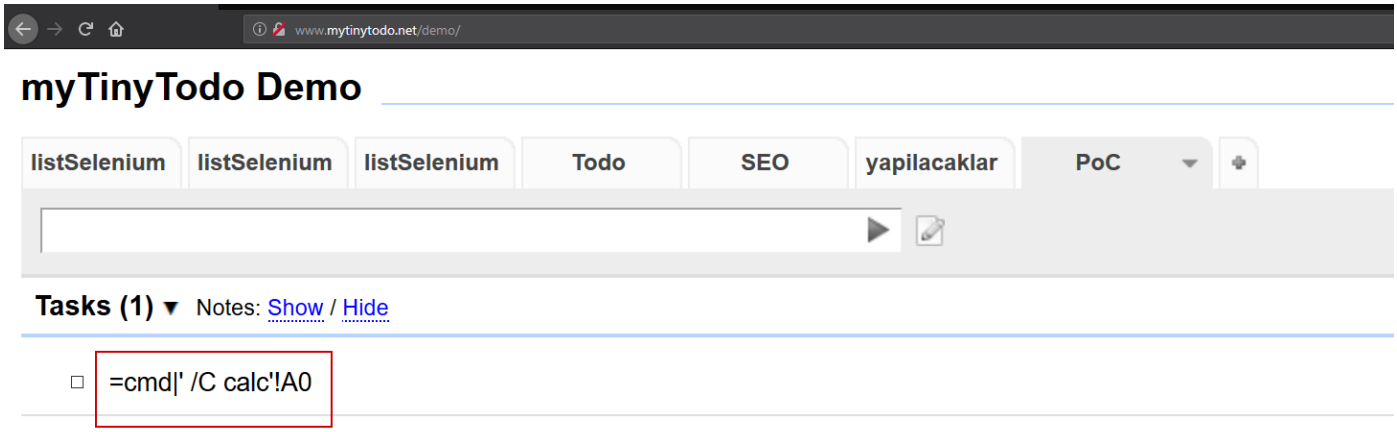
2. Create new list



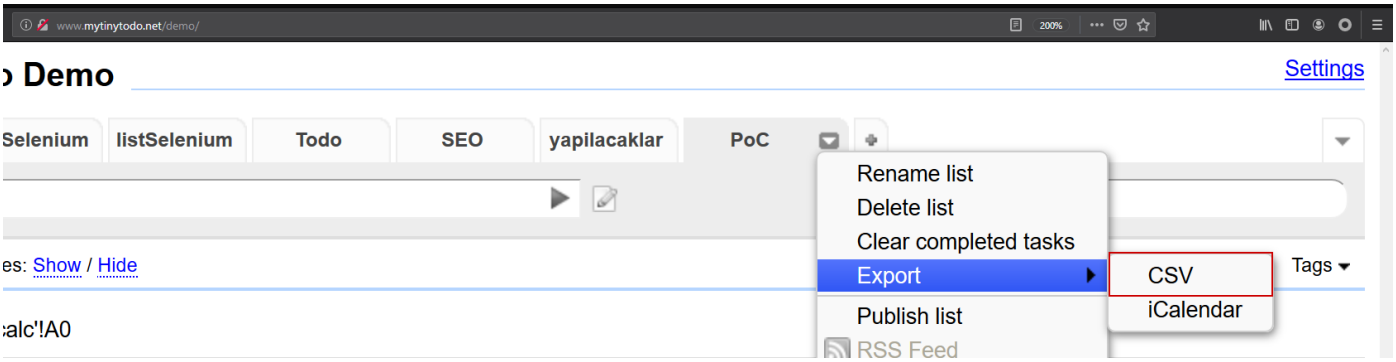
3. Insert `=cmd|' /C calc'!A0` and click add



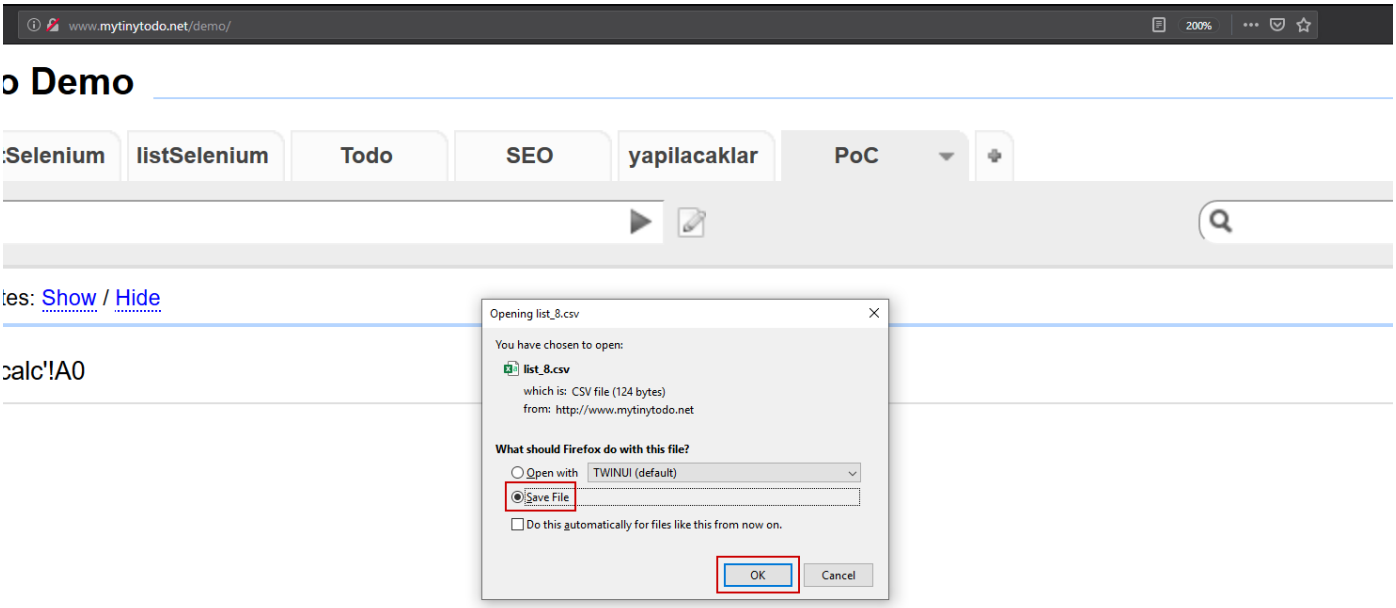
4. The malicious code will saved



5. Export as CSV



6. Click ok to download



7. The malicious will run automically
