[ff0218a](#) added support for specifying custom Rouge formatters with the constraint that the formatter be in the `Rouge::Formatters` namespace, but it did not actually enforce this constraint. For example, this is valid:

```
Rouge::Formatters.const_get('CSV')  
=> CSV
```

Adding the `false` parameter to `const_get` prevents this:

```
Rouge::Formatters.const_get('CSV', false)  
NameError: uninitialized constant Rouge::Formatters::CSV
```

Owner

Thanks! I think this makes sense also from a security point of view.

@gettalong Thanks! Would you mind merging and tagging a new release?

gettalong commented on Mar 15, 2021

Owner

There will be a release in due time.

gettalong commented on Mar 17, 2021

Owner

Thank you - merged and will be in the upcoming release.

Source of CVSS 9.9 in [GitLab](#).

I see no reason to keep it disconnected/under wraps once the patch (and consequently the vector) is known.
