Hello
Thanks for maintaining this open-source project
I would like to report a path traversal vulnerability similar to:

- Closed Path Traversal Vulnerability #1592
- Closed Path Traversal Vulnerability #1592

In the `ImportController.Create` method, the `model.TempFileName` user-controlled input is not validated and an attacker can perform a path traversal attack to [copy an arbitrary file into a new profil and delete the original file](#).

```
4  
5 EntityType=1&TempFileName=../../../../sensitivefile.xml&name=foo.xml&ImportFileUploader-file=
```

Eric

Author

Thank you @mgesing for the quick fixes
For information, this vulnerability and the ones reported in [#2113](#) have been found automatically by [SonarSource](#) products.
You can try [sonarcloud.io](#) for instance, it's free for open-source projects.
