

[CVE-2020-25561] SapphireIMS: Hardcoded credentials

Posted on Sep 19, 2020

Description

It was observed that SapphireIMS utilized default `sapphire:ims` credentials to connect the client to server. This credential is saved in `ServerConf.config` file in the client.

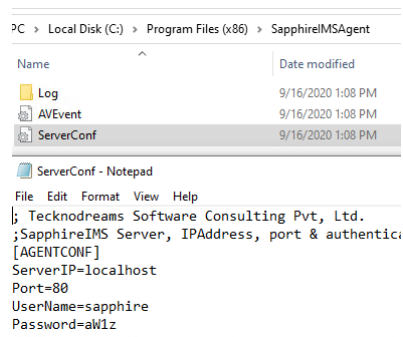

CVSS 3.0 Base Score

4.4 (AV:L/AC:L/PR:L/UI:N/S:U/C:L/I:L/A:N)
