disclosure of information about sqlite

I download this cms and i first install it .

index.php:

```
if( !file_exists('./data/config.php') ) {
    exit('<h3>配置文件不存在, 请将站点目录下的config.simple.php复制为data/config.php</h3>');
}
//检查数据库是否存在, 不存在则复制数据库
if( !file_exists('./data/onenav.db3') ) {
    copy('db/onenav.simple.db3', 'data/onenav.db3');
    // copy('db/.htaccess', 'data/.htaccess');
}

//载入配置文件
require("./data/config.php");

//根据不同的请求载入不同的方法
//如果没有请求控制器
if(!isset($c) || ($c == '')){
    //载入主页
    include_once("./controller/index.php");
}

else{
    include_once("./controller/".$c.'.php');
}
```

bug code :

```
if( !file_exists('./data/onenav.db3') ) {
    copy('db/onenav.simple.db3', 'data/onenav.db3');
```

then i try to require "/data/onenav.db3" and "/data/.htaccess" http response status 200

it means i can download onenav.db3 and

localhost/www.onenav.cms/

can gets some privacy information

you can add some random code to document name or sqlite database name .

this cms has many users.

Owner

hello, You can set things up to prevent the database from being downloaded. You can refer to this link: <https://www.yuque.com/helloz/onenav/install#ImLOx>
