Add Doctor info payload to Doctor Special of Add Doctor page to target /admin-panel1.php, then use burpsuite get requests datas, change the 'special' parameter to xss payload: `<script>alert(123)</script>`  
Step to exploit:

1. Navigate to <http://hospital.com/admin-panel1.php>
2. Click 'Add Doctors ', use burpsuite to insert xss payload in the "special" parameter
3. Click "Add Doctors"

Proof of concept (Poc):  
<script>alert(123)</script>
