...

Hello,

when drachtio-server starts, creates `/var/log/drachtio` with mode 777

This leads to a disclosure because a local user can retrieve sensitive data (like IP and so on).

Here is the details:

```
drachtio1 ~ # systemctl stop drachtio
drachtio1 ~ # rm -fr /var/log/drachtio
drachtio1 ~ # systemctl start drachtio
drachtio1 ~ # ls -la /var/log/drachtio/
total 12
drwxrwxrwx  3 root root 4096 Nov 18 16:01 .
drwxr-xr-x 15 root root 4096 Nov 18 16:01 ..
drwxrwxrwx  2 root root 4096 Nov 18 16:01 archive
-rw-rw-rw-  1 root root   0 Nov 18 16:01 drachtio.log
```

To fix this issue, `/var/log/drachtio` should be created with mode 770

...

[CVE-2022-45473](#) as been assigned to this issue.

[davehorton](#) commented [Nov 25, 2022](#)

...

could you please update the various entries you made out in the world to indicate this is fixed

[asarubbo](#) commented [Nov 25, 2022](#)

...

I don't know what stays for "entries you made out in the world"

The CVE was requested when the issue was unfixed. When it was fixed I sent an update, but the update on [nvd.nist.gov](#) does not depend on me.
