Bus Pass Management Project in Php is a web-based technology that will manage the records of the pass which is issue by administrative and also help to provide online bus pass to people who need to travel daily. Bus Pass Management System project is helpful to bus administration by reducing the paperwork, time consumption and makes the process of getting bus passes as simple and fast.

Bus Pass Management system uses PHP and MySQL databases. This is the project which keeps records of the pass which is issue by the administrative. Bus Pass Management system has two modules i.e. admin and user.

Admin

Dashboard: In this sections, admin can briefly view the total number of categories and how many passes will be generated in one day, yesterdays and the last seven's days

Category: In this section, admin can manage the category (add/update).

Passes: In this section, admin can manage pass(add/update/take print pass).

Pages: In this section, admin can update about us and contact us pages.

Enquiry: In this section, admin reads the inquiries which are sent by users.

Reports: In this section admin can generate pass reports between two dates.

Search: In this section, admin can search a particular pass bypass number.

- Download the zip file
- Extract the file and copy `buspassms` folder
- Paste inside root directory(for xampp `xampp/htdocs`, for wamp `wamp/www`, for lamp `var/www/html`)
- Open PHPMyAdmin (<http://localhost/phpmyadmin>)
- Create a database with name `buspassdb`
- Import `buspassdb.sql` file(given inside the zip package in SQL file folder)
- Run the script `http://localhost/buspassms`

Admin Credential

Anuj Kumar

Hi! I am Anuj Kumar, a professional web developer with 5+ years of experience in this sector. I found PHPGurukul in September 2015. My keen interest in technology and sharing knowledge with others became the main reason for starting PHPGurukul. My basic aim is to offer all web development tutorials like PHP, PDO, jQuery, PHP oops, MySQL, etc. Apart from the tutorials, we also offer you PHP Projects, and we have around 100+ PHP Projects for you.
