Multiple Cross Site Scripting in X2CRM 7.1 #183

Hades484 opened this issue on Feb 11, 2021 · 0 comments

Hades484 commented on Feb 11, 2021

Hi,

I have found the multiple stored XSS in the X2crm version 7.1. I like to report them and get the CVE.

Location: <http://localhost/x2crm/x2engine/index.php/contacts/create>

Parameter: Last Name

Payload inserted

The screenshot shows the 'Update Contact' form in X2CRM. The 'Last Name' field is highlighted with a red box and contains the payload `<script>alert(2)</script>`. The form includes sections for Contact Info, Sales & Marketing, Address, and Background Info. The 'Save' button is visible in the top right corner.

Execution of the payload

The screenshot shows the 'Update Contact' form with the payload `<script>alert(2)</script>` in the 'Last Name' field. A modal dialog box is displayed in the center of the screen, showing the number '2' in a red box, indicating the successful execution of the alert payload. The form fields and buttons are visible in the background.

Location: <http://localhost/x2crm/x2engine/index.php/profile/activity>

Parameter: comments

payload inserted
