### Maipu Access Router Exploit

```
1 The web interface of Maipu MP1800X-50 7.5.3.14(R) devices allows
2 remote attackers to obtain sensitive information via the
3 form/formDeviceVerGet URI, such as system id, hardware model, hardware
4 version, bootloader version, software version, software image file,
5 compilation time, and system uptime.
6
7 The attacker just has to create a request to
8
9 http://routerip/form/formDeviceVerGet
10
11 and in the response the whole information about the router will be disclosed to the attacker.
12
13
```
