## Solution Fixed

Update the WordPress Age Gate plugin to the latest available version (at least 2.17.1).

## Details Show technical details

Nguyen Van Khanh discovered and reported this Cross Site Scripting (XSS) vulnerability in WordPress Age Gate Plugin. This could allow a malicious actor to inject malicious scripts, such as redirects, advertisements, and other HTML payloads into your website which will be executed when guests visit your site. This vulnerability has been fixed in version 2.17.1.
