Add Doctor info payload to Doctor Name of Add Doctor page to target /admin-panel1.php ,then use burpsuite get requests datas,change the 'dpassword' parameter to xss payload: `<sCrIpT>alert(7777)</ScRiPt>`

Steps to exploit:

1. Navigate to <http://hospital.com/admin-panel1.php>
2. click 'Add Doctors ', use burpsuite to insert xss payload in the "dpassword" parameter
3. Click "Add Doctors"

Proof of concept (Poc):  
<sCrIpT>alert(7777)</ScRiPt>
