We discovered a potential code execution backdoor in version 0.1.0 of the project, the backdoor is the democritus-file-system package. Attackers can upload democritus-file-system packages containing arbitrary malicious code. For the safety of this project, the democritus-file-system package has been uploaded by us.

@di110o: Thanks for reporting this issue, but this is not something I'm going to resolve as no-one should be using such an old version of this library (and this library isn't widely used anyway).

@di110o: Can you please stop creating these issues? I appreciate the help and your concern, but this is really not a concern and is not worth the time it takes to fix.
