This is an automated email from the ASF dual-hosted git repository.

manikumar pushed a commit to branch 2.7
in repository <https://gitbox.apache.org/repos/asf/kafka.git> (<https://gitbox.apache.org/repos/asf/kafka.git>)

The following commit(s) were added to refs/heads/2.7 by this push:
new ecdfb77 KAFKA-12752: Bump Jersey deps to 2.34 due to CVE-2021-28168 (#10636)
ecdfb77 is described below

commit ecdfb77263835be52d02e59e6e33c37ea8f902df
Author: Shay Elkin <20...@users.noreply.github.com>
AuthorDate: Thu May 6 07:44:03 2021 -0700

KAFKA-12752: Bump Jersey deps to 2.34 due to CVE-2021-28168 (#10636)

The version of the Eclipse Jersey library brought as dependencies,
2.31, has a known vulnerability, CVE-2021-28168 (<https://github.com/advisories/GHSA-c43q-5hbj-4crv> (<https://github.com/advisories/GHSA-c43q-5hbj-4crv>)).

This replaces it with 2.34, which is fully compatible with
2.31, except for bugs and vulnerabilities.

Reviewers: Manikumar Reddy <ma...@gmail.com>
