Cross Site Script Vulnerability NavigateCMS 2.9 #19

🔒 Closed

travannam186 opened this issue on Jun 19, 2020 · 1 comment

travannam186 commented on Jun 19, 2020

Expected behaviour

An authenticated malicious user can take advantage of a Reflected XSS vulnerability in the **name="Aliases"** feature.

Impact

Commonly include transmitting private data, like cookies or other session information, to the attacker, redirecting the victim to web content controlled by the attacker, or performing other malicious operations on the user's machine under the guise of the vulnerable site.

Steps to reproduce

1. Log into the Admin.
2. Go to function "Web > Web sites"
3. Go to "create > Aliases > add"
4. add "/// # "><svg/onload=prompt(/NamTV/)>" in textbox Alias and Real URL.
5. Click "save".

-----result-----
