Hi, I would like to report login brute force vulnerability in latest release.

Login brute force vulnerability in app/api/cms/user.py 43 line login() function.

No need to limit the number of logins and set the verification code will cause the username and password to be brute force, like this:

Results	Target	Po
---------	--------	----

Results	Target	Positions	Payloads	Options
---------	--------	-----------	----------	---------

Filter: Showing all items

Request	Payload	Status	Error	Timeout	Length	Comment
---------	---------	--------	-------	---------	--------	---------

Raw	Params	Headers	Hex
-----	--------	---------	-----

0 matches

Thank for your advice, We will deal with this bug in the next release.

Hi @colorful3 @HatBoy,

Was this issue fixed?

Was this issue fixed?

if so, in what commit and what tag/version?

thanks!
