# CVE-2022-30777

## Reflected XSS on sites using Parallels H-Sphere

Discovered by : Ronit Bhatt

Reference: <https://en.wikipedia.org/wiki/H-Sphere>

### Bug Description:

Cross-site scripting (XSS) vulnerability in sites using outdated H-Sphere hosting (3.6.17) allows remote attackers to inject arbitrary web script or HTML via the “from” parameter.

### Steps To Reproduce:

1. Visit the home page/Default page of the site using H-Sphere

12

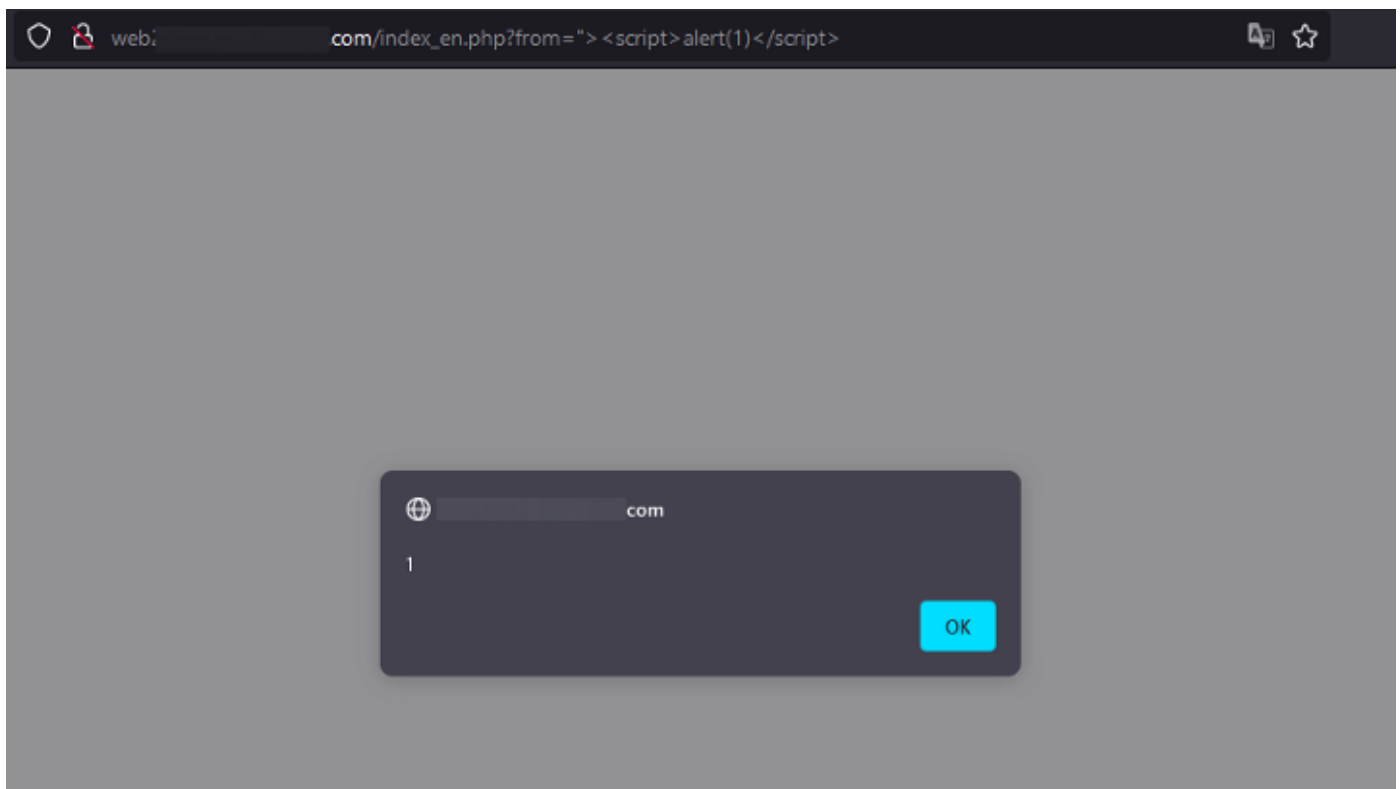

Open in app

Get started

This page is autogenerated by Parallels® H-Sphere

2. Go to the url mention in the below screenshot i.e./index\_en.php?from=""><script>alert(1)</script>. Also at times try hitting the endpoint /index.php instead of /index\_en.php

3. ROOM 11 YSS would trigger
