The School File Management System with Source Code is a PHP project that can store student files individually and retrieve them afterward. The system was built using **PHP, HTML, MySQLi, and Javascript**. The system is so easy to understand, the administrator can add a new user and student account. The system has an auto-delete feature when you remove a student it will also automatically remove the existing files of that student. The admin user will be in charge of maintaining the users' accounts and students' accounts.

## Features

Admin

- **Manage User Accounts**
- **Manage Student Accounts**

#### Student

- **Upload File**
- **Download File**
- **Delete File**
- **Update Account**

This Mini-Project is free to download. Feel Free to download and modify this School File Management System in PHP. Follow the instructions below to run the web application.

## How to Run

#### Requirements:

It's your Property work  
or Instant Updated Market Report, Inclu

- **Download** and **Install** any **local web server** such as **XAMPP/WAMP**.
- **Download** the provided **source code zip file**. (download button is located below)

#### Installation

1. **Open** your **XAMPP/WAMP's Control Panel** and start the **"Apache"** and **"MySQL"**.
2. **Extract** the source code **zip** file.
3. If you are using **XAMPP**, **copy** the extracted source code folder and **paste** it into the **xampp's "htdocs" directory**. If you are using **WAMP**, **paste** it inside the **"www" directory**.
4. **Open** a **web browser** and browse the **PHPMyAdmin**. (<http://localhost/phpmyadmin>)
5. **Create** a **new database** naming **"db\_sfms"**.
6. **Import** the **provided SQL file** into your **newly created database**. The SQL file is known as **"db\_sfms.sql"** and it is located inside the **"db"** directory of the source code folder.
7. **Browse** the **web application** in a browser. i.e. (<http://localhost/School%20File%20Management%20System/>) for the **student** side and (<http://localhost/School%20File%20Management%20System/admin>) for the **admin** side

(/#facebook) (/#twitter)

Note: Due to the size or complexity of this submission, the author has submitted it as a .zip file to shorten your download time. After downloading it, you will need a program like Winzip to decompress it.

Virus note: All files are scanned once-a-day by SourceCodester.com for viruses, but new viruses come out every day, so no prevention program can catch 100% of them.

FOR YOUR OWN SAFETY, PLEASE:

1. Re-scan downloaded files using your personal virus checker before using it.
2. NEVER, EVER run compiled files (.exe's, .ocx's, .dll's etc.)—only run source code.

**Need your help on this Project (/comment/93221#comment-93221)**

Hello Sir/Madam, Thank you so much for this wonderful Project. However I need your help, How do I make the administrator able to post documents in bulk to specific students from the Administrators dash board? Thank you so Much, Regards. Cheers!!!
