```
1 <?php
2
3 declare(strict_types=1);
4
5 namespace Bolt\Controller\Frontend;
6
7 use Bolt\Controller\TwigAwareController;
8 use Symfony\Component\HttpFoundation\Response;
9 use Symfony\Component\Routing\Annotation\Route;
10
11 class TemplateController extends TwigAwareController implements FrontendZoneInterface
12 {
13     /**
14      * Render a template. Convenient for when we simply wish to render a template as-is. Used as a
15      * fallback for the 404 or maintenance pages, for instance.
16      *
17      * Note: This is _not_ assigned a Route by default. If it were, it's a potential security risk,
18      * since a would-be attacker could try to access template files from both the theme and bolt
19      * directly.
20      */
21     public function template(string $templateName): Response
22     {
23         $templates = [$templateName];
24
25         return $this->render($templates, []);
26     }
27 }
```
