Apartment Visitor Management System-XSS

Date:

2022-08/06

Exploit Author:

anx0ing@gmail.com

Vendor Homepage:

<https://www.sourcecodester.com>

Software Link:

<https://www.sourcecodester.com/php-apartment-visitor-management-system-source-code>

Version:

1.0

/manage-apartment.php

in Add New Entry insert Cross Site Scripting(XSS) Code

Apartment Number Parameters have Cross Site Scripting(XSS)

POC

```
<script>alert(1)</script>
```

The screenshot shows a web browser displaying the AVMS application. The address bar shows the URL `172.20.10.14/avms/manage-apartment.php`. The application interface includes a sidebar with navigation links: Dashboard, Apartment List, New Visitor Entry, Current Visitors, Visitor List, and Reports. The main content area displays a "List of Apartment" table with columns for #, Apartment Number, and Building. A modal dialog is open, showing a confirmation message "172.20.10.14 显示 1" and a "确定" (Confirm) button. Below the table, a "view-source" window is open, showing the source code of the page. The source code reveals the injected XSS payload: `<td><script>alert(1)</script></td>`.

#	Apartment Number	Building
