Cross-Site Scripting (XSS) in "admin/pages.php?action=add_new" #23

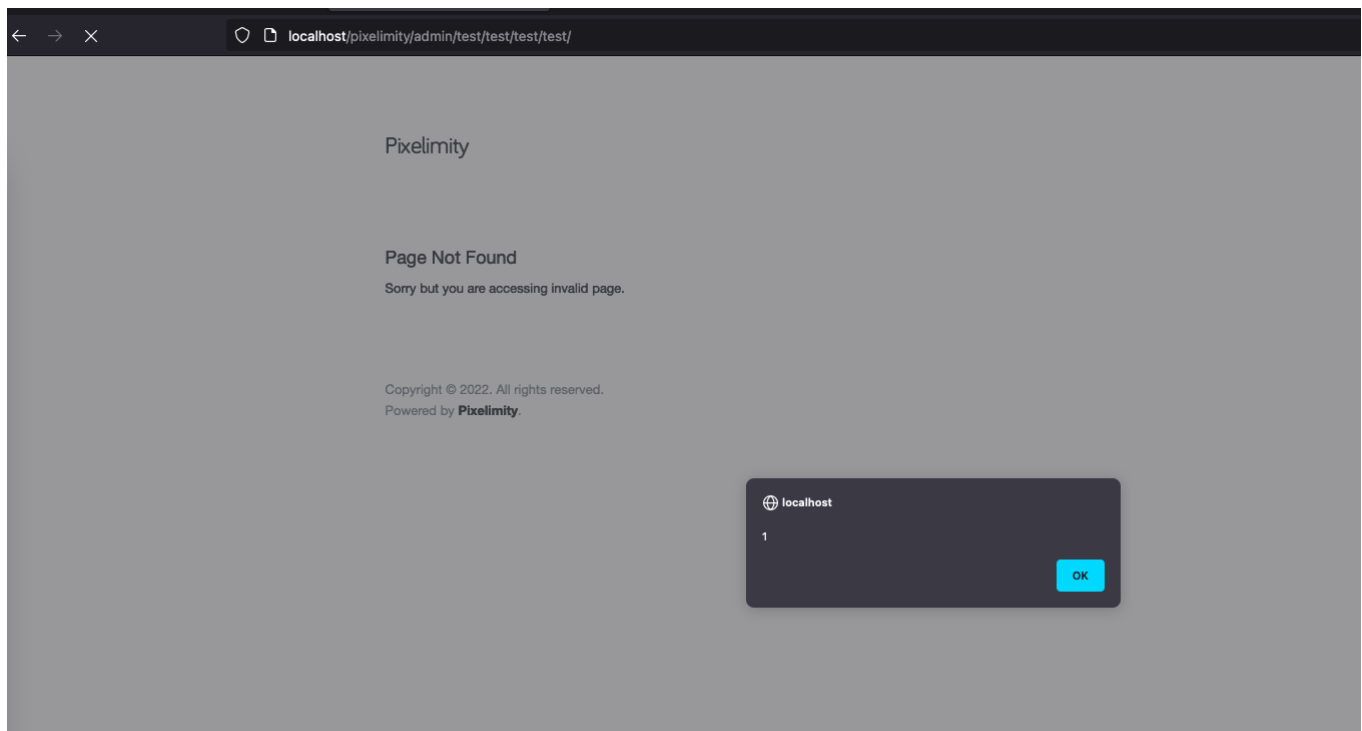

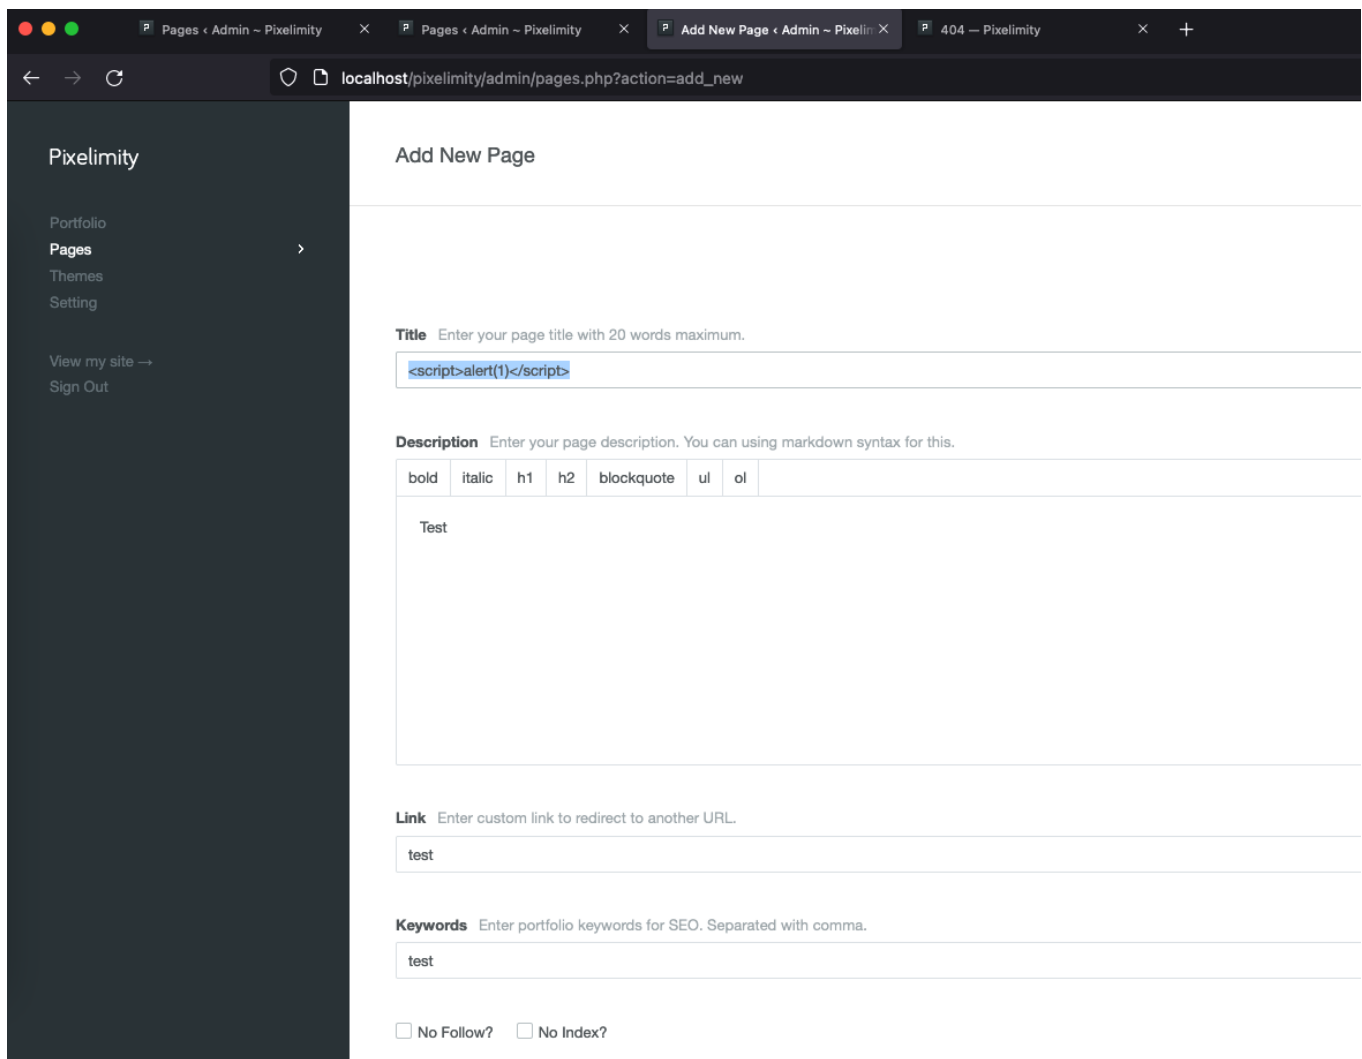

[Open](#) **tuando243** opened this issue on Apr 1 · 0 comments

tuando243 commented on Apr 1

A Cross Site Scripting vulnerabilty exists in Pixelimity via the Page Title field in pixelimity/admin/pages.php?action=add_new

Step to exploit:

1. Login as admin.
2. Navigate to <http://127.0.0.1/pixelimity/admin/pages.php> and click on Add New.
3. Insert XSS payload (<script>alert(1)</script>) in the "Title" field and click on Publish Page.

Proof of concept (Poc):
<script>alert(1)</script>
