Heap-buffer-overflow in fallback-motion.cc: in put_qpel_0_0_fallback_16 #346

[Open](#) FDU-Sec opened this issue on Oct 10 · 0 comments

FDU-Sec commented on Oct 10

Description

Heap-buffer-overflow (/libde265/build/libde265/liblibde265.so+0x146a04) in put_qpel_0_0_fallback_16(short*, long, unsigned short const*, long, int, int, short*, int)

Version

```
$ ./dec265 -h
dec265 v1.0.8
-----
usage: dec265 [options] videofile.bin
The video file must be a raw bitstream, or a stream with NAL units (option -n).

options:
  -q, --quiet           do not show decoded image
  -t, --threads N       set number of worker threads (0 - no threading)
  -c, --check-hash      perform hash check
  -n, --nal             input is a stream with 4-byte length prefixed NAL units
  -f, --frames N        set number of frames to process
  -o, --output          write YUV reconstruction
  -d, --dump            dump headers
  -0, --noaccel         do not use any accelerated code (SSE)
  -v, --verbose         increase verbosity level (up to 3 times)
  -L, --no-logging      disable logging
  -B, --write-bytestream FILENAME write raw bytestream (from NAL input)
  -m, --measure YUV     compute PSNRs relative to reference YUV
  -T, --highest-TID select highest temporal sublayer to decode
      --disable-deblocking disable deblocking filter
      --disable-sao      disable sample-adaptive offset filter
  -h, --help           show help
```

Replay

```
git clone https://github.com/strukturag/libde265.git
cd libde265
mkdir build
cd build
cmake ../ -DCMAKE_CXX_FLAGS="-fsanitize=address"
make -j$(nproc)
./dec265/dec265 poc12
```
