[Password Storage Application v1.0](#) was discovered to contain a cross-site scripting (XSS) vulnerability via the add-fee.php. This vulnerability allows attackers to execute arbitrary web scripts or HTML via a crafted payload injected into the cmddept parameter.

1. vendors: sourcecodester.com;
2. Vulnerability location: /psa_php/api.php?action=save

[+] Payload:

```
"><script>alert(1)</script>
```

Please execute the Payload provided above, as shown in the following figure :
