How to use GitHub

- Please use the  [reaction](#) to show that you are affected by the same issue.
- Please don't comment if you have no relevant information to add. It's just extra noise for everyone subscribed to this issue.
- Subscribe to receive notifications on status change and new comments.

Steps to reproduce

1. As user A create a room with group 1 where user B is a member of
2. As user A set custom permissions for user B only change to remove the camera permission
3. As user A start a call
4. As user B try to join the call

Expected behaviour

User B can join and talk

Actual behaviour

User B is disconnecting and connecting all the time

Talk app

Talk app version: master

Custom Signaling server configured: no

Custom TURN server configured: no

Custom STUN server configured: no

Browser

Microphone available: yes - using fake stream

Camera available: yes - using fake stream

Operating system: Ubuntu

With the HPB this is a regression (ironically) introduced in [#6992](#) Without the HPB this was happening on v13.0.0 already 🤔 In both cases the problem is the same (only audio or only video permissions are not properly handled) and it will be implicitly fixed by the changes in [#7034](#)
