File upload

In laobancms/admin/wenjian.php line 103 to 112

```
103 if(isset($_POST['shangchuan'])){
104     $total = count($_FILES['sc']['name']); //上传数量
105     for($i=0; $i<$total; $i++){
106         if(strstr($_FILES['sc']['name'][$i],'.jpg') || strstr($_FILES['sc']['name'][$i],'.png') || strstr($_FILES['sc']['name'][$i],'.gif') || strstr($_FILES['sc']['name'][$i],'.jpeg') || strstr($_FILES['sc']['name'][$i],'.html') || strstr($_FILES['sc']['name'][$i],'.js') || strstr($_FILES['sc']['name'][$i],'.css')){
107             move_uploaded_file($_FILES['sc']['tmp_name'][$i],"$wj/".$_FILES['sc']['name'][$i]);
108         }
109         else{echo "<script>alert('你上传的文件格式不正确, 请重新选择上传文件');window.location='wenjian.php?wj=$wj';</script>";}
110     }
111     echo "<script>alert('上传成功');window.location='wenjian.php?wj=$wj';</script>";
112 }
```

It simply validates the existence of '.jpg|.png|.gif|.jpeg|.html|.js|.css' in the file name by using the strstr() function.

So, upload test.jpg.php

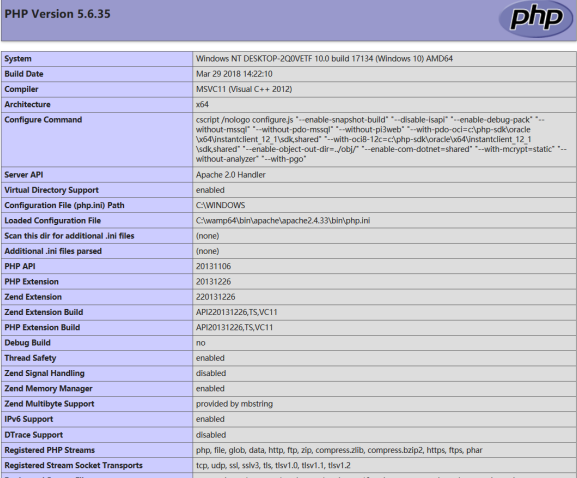

First, login the admin page by setting the cookie(id=1) (CVE-2018-19224)

名称	域名	路径	过期时间	创建时间	值	网站
Cookie	127.0.0.1	/laobancms/admin/	Sat, 09 Feb 2019 03:06:49 GMT	Fri, 08 Feb 2019 06:37:53 GMT	1	httpOnly

Visit admin/wenjian.php?wj=../templates/pc, upload test.jpg.php

Vist: templates/pc/test.jpg.php

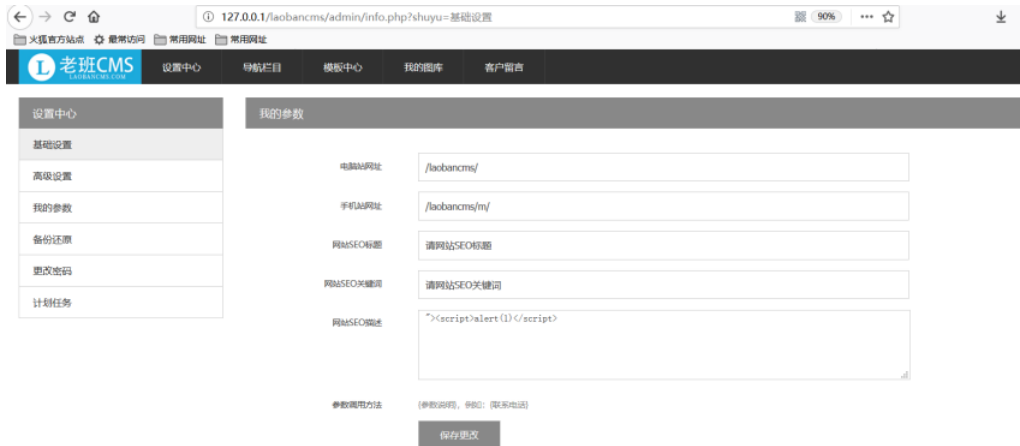

XSS1

Visit: admin/info.php?shuyu=基础设置

Click the '保存更改' button to save the changes

Then visit the index

XSS2

Login the admin page by setting the cookie(id=1) (CVE-2018-19224)

Visit: `admin/info.php?shuyu=我的参数`

Fill `<script>alert(1)</script>` in the "首页简介" form

Click the '保存更改' button to save the changes

Click the '生成'-'>'-'更新今日' button in the upper right corner to update

Then visit the index
