Hi, I would like to report Cross Site Scripting vulnerability in YzmCMS V5.8

Description:

In the content.class.php row 42, No filtering of the searinfo parameterA xss vulnerability was discovered in yzmcms.

In YzmCMS v5.8, stored XSS exists via the `/admin/system_manage/user_config_edit.html` value parameter, which allows remote attackers to inject arbitrary web script or HTML.
