Description

Quorum 2.03 and earlier stores all user information in .dat files on the local disk. This can lead to leakages of information when access to the file system is permitted or when used in conjunction with the LFI.

Vulnerability type

Cleartext Credential Storage

Vendor

NCH Software

Affected versions

Quorum 2.03 and earlier

Attack type

Local

Authenticated

Yes

Attack vectors

Quorum stores all registered user information in a .dat file on the local disk. The files contain cleartext username, password and auth level.

C:\ProgramData\NCH Software\Quorum\Users\{user}.dat
