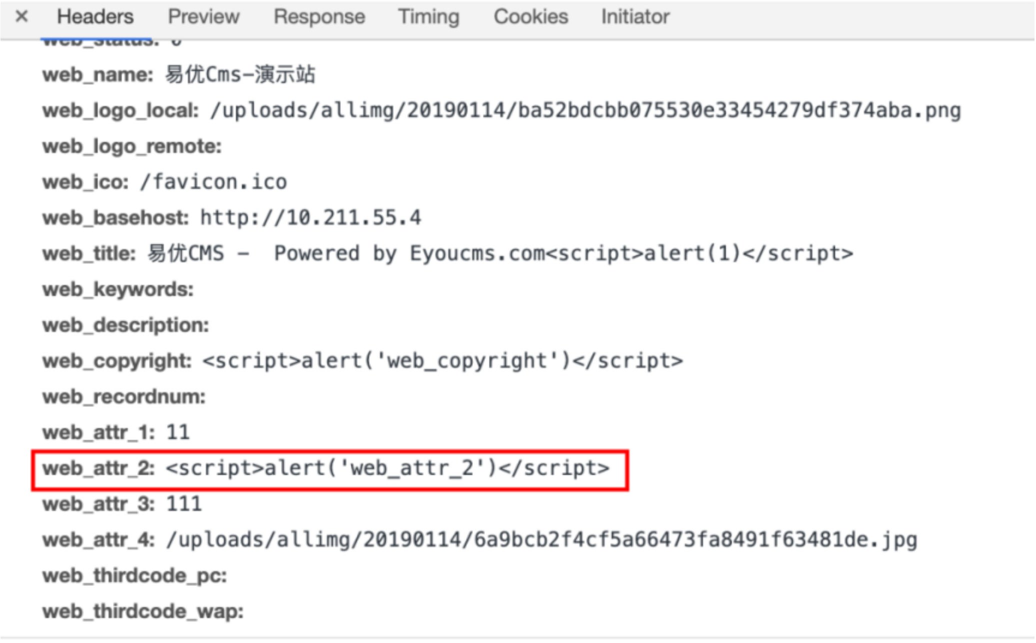
Storage XSS refers to an application that directly stores malicious code submitted by the attacker to the background. When the display data page is accessed, the malicious script executes malicious code in the browser due to html injection and the attacker controls the browser.

After the administrator logged in, open the following one page

url:http://127.0.0.1/EyouCMS/login.php

poc: in web_attr_2



```

Hi,
are you planning to fix this issue?

Well, this issue was submitted 19 months ago. At present, eyoucms has released version 1.5.4. I have not retested the issue for the latest version. If you are interested, you may have a try :)
