Integer Overflow or Wraparound in microweber/microweber

0

Reported on Mar 9th 2022

Description

The microweber application allows large characters to insert in the input field like "Town, ZIP, State, Address, and Additional Info field" which can allow attackers to cause a Denial of Service (DoS) via a crafted HTTP request.

Proof of Concept

- 1.Buy a product and in the Shipping method you will get input field of "Town, ZIP, State, Address, and Additional Info field".
- 2.Copy the below payload and put it in the input fields and click on continue.
- 3. You will see the application accepts large characters and if we will increase the characters then it can lead to Dos.
