## Expired reshare links allow access to all files in share

Share: **f y** in Y

## SUMMARY BY NEXTCLOUD

After a reshared subfolder link has expired, the link allows access to the full folder.

I found the Problem in Nextcloud 14.0.3, but it still persists in 14.0.4 Steps:

- 1. share folder "A" with an nextcloud group
- 2. reshare a subfolder "B" of this folder with another user on this group (in this case the user both have group admin) as public link.
- 3. set an expiry date
- 4. let date expire
- $5. open {\it link} \, {\it Expected} \, {\it result:} \, {\it You} \, {\it see} \, {\it a} \, {\it message} \, {\it that} \, \, {\it the} \, {\it link} \, {\it has} \, {\it expired} \, {\it Actual} \, {\it result:} \, {\it You} \, {\it have} \, {\it access} \, {\it to} \, \, {\it the} \, {\it initial} \, {\it shared} \, {\it folder} \, "A" \, {\it the} \, {\it link} \, {\it link} \, {\it the} \, {\it link} \, {\it link} \, {\it link} \, {\it the} \, {\it link} \, {\it link}$

Impact

After getting a reshared link for a subfolder with expiry date (legitimately or through social engineering) the attacker just has to wait for expiry for full access to all Files in the share

Files in the share.	uli access to all
