URI validation failure does not halt font registration #2994

⊘ Closed   **bsweeney** opened this issue on Aug 25 · 0 comments · Fixed by #2995

bsweeney commented on Aug 25   Member

When a font is registered, such as through the `@font-face` rule, the URL is run through the standard validation rules. The validation logic, however, does not halt processing of the font when validation fails. Expectation is that failure of rule validation would halt registration of the font.
