automad<=1.10.9 Stored Cross-Site Scripting(XSS)

Description

```
The system Client doesn't properly sanitise POST parameter, which result into a
Stored Cross-Site Scripting(XSS).
```

Vendor Homepage

```
https://github.com/marcantondahmen/automad
https://automad.org/
```

Author

```
xiahao@webray.com.cn inc
```
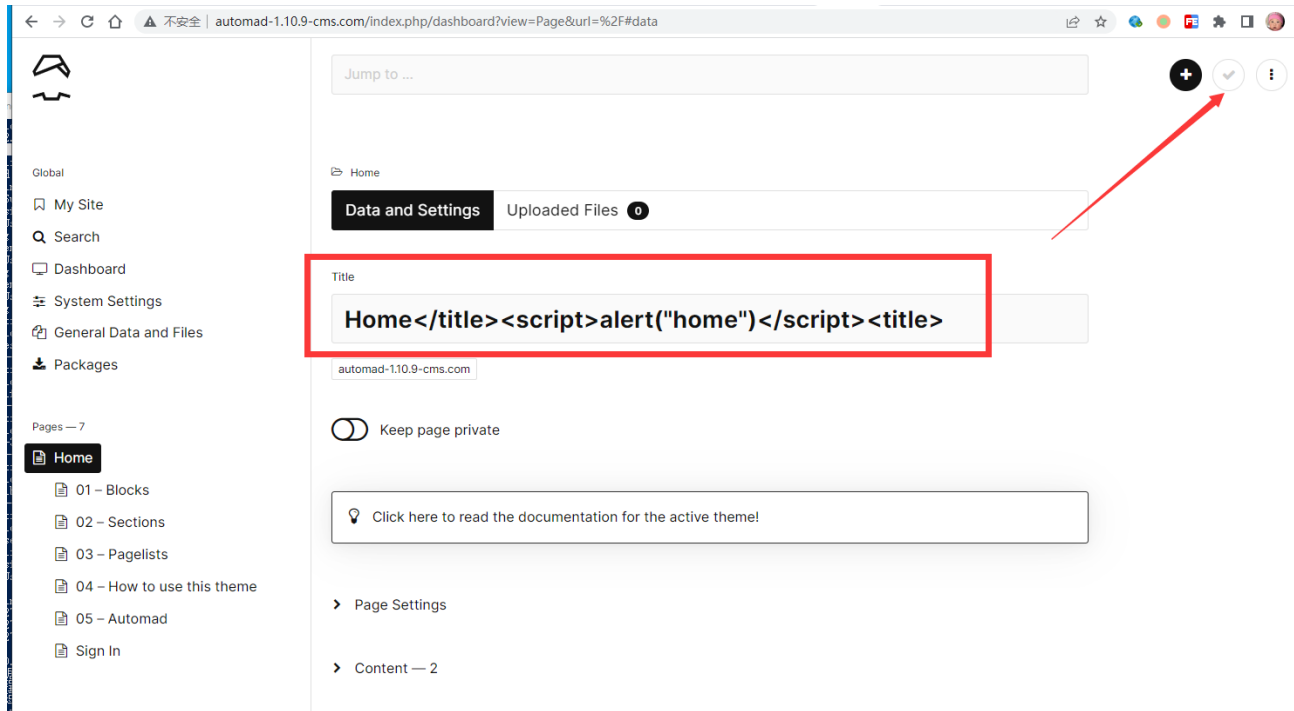

Proof of Concept

1,After installing the program, log in to the background system, modify the website title and inject attack code, and then submit

```
Home</title><script>alert("home")</script><title>
```

2,Visiting the home page of the website will trigger the code
