[CVE-2022-40444](#)
Vulnerability Author：yuanlirong 袁利荣
**Attack vector(s):**
zzcms is a set of content management system (CMS) of China's zzcms team.
The zzcms 2022 version has a vulnerability that the zzcms management landing page leaks absolute path information. An unauthenticated attacker can obtain the error information showing the location (absolute path) of the application returned by the server by visiting "/admin/index.PHP? _server" on the zzcms management login page.

**Product:**
ZZCMS

**Version:**
ZZCMS 2022

**Vendor Homepage:**
http://www.zzcms.net/

**Software Link:**
http://www.zzcms.net/download/zzcms2022.zip

or
https://github.com/liong007/ZZCMS/releases/download/ZZCMS2022/zzcms2022.zip

**POC:**
Request "/admin/index php?_ Server", Response error information returned by the server showing the location (absolute path) of the application.

**Affected pages:**
All pages that contain page /admin/index php?_ Server
