app.js

```js
import angular from 'angular';
import 'angular-material';
import 'angular-messages';
import './app/angular-locale_en_broken.js';

// Import your app stylesheets
import './style.css';

// Import your app functionality
import './app/index.js';

// Create and bootstrap application
const requires = ['app', 'ngMaterial', 'ngMessages'];
const app = angular.module('appRoot', requires);
app.config([
  '$mdGestureProvider',
  '$mdThemingProvider',
  function ($mdGestureProvider, $mdThemingProvider) {
    $mdGestureProvider.skipClickHijack();
    $mdThemingProvider
      .theme('default')
      .primaryPalette('purple')
      .accentPalette('green');
  },
]);
window.app = app;
```
