Information Exposure

Affecting react-native-fast-image package, versions <8.3.0

INTRODUCED: 12 JUN 2020 CVE-2020-7696 ❓ CWE-255 ❓ (FIRST ADDED BY SNYK)

Share ⌄

How to fix?

Upgrade `react-native-fast-image` to version 8.3.0 or higher.

Overview

react-native-fast-image is a FastImage, performant React Native image component.

Affected versions of this package are vulnerable to Information Exposure. When an image with `source={{uri: "...", headers: { host: "somehost.com", authorization: "..." }}` is loaded, all other subsequent images will use the same headers, this can lead to signing credentials or other session tokens being leaked to other servers.
