CVE-2021-38833

Vendor

- SQL disaster

[+] Exploit Source: href

Description:

SQL injection vulnerability in PHPGurukul Apartment Visitors Management System (AVMS) v. 1.0 allows attackers to execute arbitrary SQL statements and to gain RCE. The PHPGurukul Apartment Visitors Management System (AVMS) v. 1.0 is also vulnerable to remote SQL-Injection-Bypass-Authentication for the admin account and the application is vulnerable to XSS-SORED vulnerability and PHPSESSID-Hijacking.

CONCLUSION:

- This vendor must STOP creating all these broken projects and vulnerable software programs, probably he is not a developer!

BR

- [+] @nu11secur1ty System Administrator - Infrastructure and Penetration Testing Engineer
