This modification is still not sufficient， for router "/v1/yangeryl/:name" url like
"/v1/yangeryl.xml/yangeryl.xml" can also be matched

`2022/05/17 14:41:47.601 [D] [router.go:1272] |    127.0.0.1| 200 |    549.5µs|  match| GET   /v1/yangeryl.xml/yangeryl.xml   r:/v1/yangeryl/:name`

Both v2.0.2 and v1.12.4 have this problem ,and I know your fix about "pick the fix 4459: /abc.html/aaa match
/abc/aaa"
but the modification is still not sufficient, for router "/v1/aa/bb/:name" ,url "/v1/aa.xml/bb/aa.xml" can also be
matched. The key here is keep the last ":name"(aa.xml) and the fix route(aa) with ".xml .json .html" suffix the
same.
