# Cross-site-scripting-DOM-based-IG-js

# Description:

The Inout Blockchain AltExchanger (version 1.2.1) is vulnerable to Cross-site scripting (DOM-based) Information Gathering for all java scripts - all architecture from inode /js. The attacker easily can take all information about the js infrastructure and he can use it for dangerous purposes. If this was in PRODUCTION the situation can be a little dangerous!

## STATUS:

```
Severity:   High
Confidence: Tentative
```

## Conclusion:

Improper disinfection of the `admin` inode.
