# Online Course Registration in PHP Free Source Code

Submitted by razormist (/users/razormist) on Thursday, July 15, 2021 - 12:09.

Language:

PHP (/LANGUAGE/PHP)
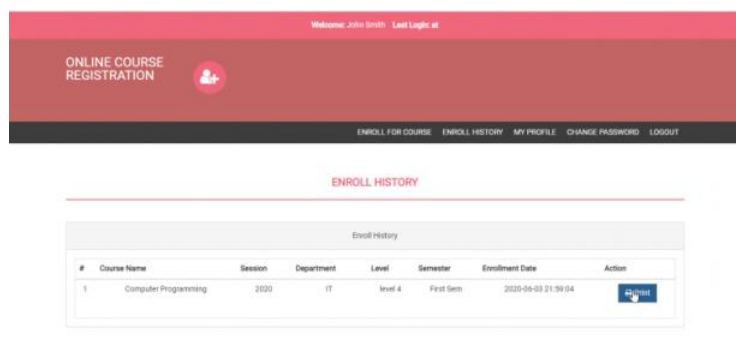

(/sites/default/files/2020-06/images/online-course-registration.png)

Online Course Registration System with **Source Code** is a **PHP** project that can enroll students in any course in a convenient way. The system is easier to use, the student is required to log in first before they can enroll. The student must provide their pin# to proceed in the selection of courses. They can also print out their registration details after finishing the enrollment process.

The Philippines   Exploring the   Why You Should   You Have to

About

The program was developed using **PHP/MySQLi, MySQL Database, HTML, CSS, Javascript, and Bootstrap**. The admin has a big purpose here, he/she will register new students, provide pin code, adding courses, and monitoring the total enrollees, in other words, the admin user is in charge of managing all of the records of this system. After the admin created the student access, the student can log in to the system using his/her Registration Number and password provided by the admin. The student can enroll in a course for a specific session and department. He/She can also update his/her system password and profile. Then the student can also print his/her enrollment records same as the admin for all students.

Features

Admin

- Secure Login
- Manage Session

- Manage Semester
- Manage Department
- Manage Course
- Register Student
- Manage Student
- List of Enrollment History
- List of Student Logs
- Print Enrollment Records

Student

- Secure Login
- Update Password
- Update and View Profile
- Enroll
- View List of Enrollment History
- Print Enrollment Records

How to Run

Requirements

- **Download** and **Install** any **local web server** such as **XAMPP/WAMP.**
- **Download** the provided source code **zip** file. (*download button is located below*)

Installation/Setup

1. **Open** your **XAMPP/WAMP's Control Panel** and start the `Apache` and `MySQL`.
2. **Extract** the **downloaded source code zip file**.
3. If you are using **XAMPP**, **copy** the extracted source code folder and **paste** it into the **XAMPP's "htdocs" directory**. And If you are using **WAMP**, **paste** it into the **"www" directory.**
4. **Browse** the `PHPMyAdmin` in a **browser**. i.e. `http://localhost/phpmyadmin`
5. **Create** a **new database** naming `onlinecourse` .
6. **Import** the provided `SQL` file. The file is known as `onlinecourse.sql` located inside the **db** folder.
7. **Browse** the **Online Course Registration System** in a **browser**. i.e. `http://localhost/Online%20Course%20Registration/` and `http://localhost/Online%20Course%20Registration/admin` for the admin side.

Note: Due to the size or complexity of this submission, the author has submitted it as a .zip file to shorten your download time. After downloading it, you will need a program like Winzip to decompress it.

Virus note: All files are scanned once-a-day by SourceCodester.com for viruses, but new viruses come out every day, so no prevention program can catch 100% of them.

FOR YOUR OWN SAFETY, PLEASE:

1. Re-scan downloaded files using your personal virus checker before using it.
2. NEVER, EVER run compiled files (.exe's, .ocx's, .dll's etc.)--only run source code.

A request for Online Course Registration (/comment/98449#comment-98449)

Hello Sir. Am from Liberia, west Africa. How much would it cost me for you to design a student registration portal for my institution?
